SUMMARY

Web Developer with a B.S. in Computer Science and 15+ years delivering web products for startups and established companies. Leads end-to-end work across legacy rewrites, customer-facing platforms, APIs, and the data systems that keep them fast in production. Track record includes shipping a proposal tool that raised revenue 10% while platforms scaled with customer growth.

SKILLS

JavaScript · PHP · Python · SQL · HTML · CSS · Claude

EXPERIENCE

Carketa · Lehi, UT

Sep 2022 – Present

- Designed and shipped a JavaScript vehicle reconditioning platform (tasking, photo capture, real-time seller API sync) that new dealerships adopt at a rate of 10 per month.
- Built a daily BigQuery and PostgreSQL analytics pipeline with partitioning, materialized views, and indexing that cut dashboard query time 75% as vehicle volume scaled.
- Led the migration of core product workflows from legacy PHP to React/JavaScript, reducing technical debt and speeding delivery of dealership features.

Python · **Claude** · React · TypeScript · Tailwind

Encore Solar · Lehi, UT

Dec 2017 – Sep 2022

- Shipped a JavaScript solar proposal tool that increased sales revenue 10% by shortening the path from design to signed contract.
- Replaced polling-based support with a Node.js/Redis queue architecture, cutting customer wait times 25% with zero downtime during the cutover.
- Led a PHP-to-React/JavaScript rewrite of the solar appraisal platform, enabling hundreds of companies to manage and sell installation contracts on a modern stack.

Python · React · TypeScript · Next.js · PostgreSQL

Grow · Orem, UT

Aug 2014 – Dec 2017

- Built a React B2B KPI dashboard that gave SMBs a single view of performance across their operations.
- Integrated hundreds of backend API data sources so customers could trust one reporting surface instead of fragmented tools.
- Delivered the product on Node/Express with Oracle, PostgreSQL, and Redis, and an Angular/React UI that cut report refresh time 50%.

React · TypeScript · Angular · Tailwind · Next.js

Zagg · Salt Lake City, UT

Dec 2010 – Aug 2014

- Built a PHP/CodeIgniter backend for shipping, finance, inventory, and custom orders that replaced fragmented store operations.
- Designed MySQL schemas for orders, stock, and financial records to support accurate fulfillment and reporting.
- Shipped the store-ops UI in JavaScript, jQuery, CSS, and HTML, cutting order-processing time 30% for warehouse and support teams.

PHP · MySQL · jQuery

Classtop · Draper, UT

Oct 2009 – Dec 2010

- Built PHP and C# Facebook applications that let students connect around classroom specialties and complete courses online.
- Implemented MySQL sharding and replication to keep data retrieval fast as the product grew, cutting query latency 75%.
- Hardened performance and data access as the application scaled to 100,000 users without sacrificing uptime.

PHP · C# · .NET · MySQL · jQuery

Stevens-Henager College · Salt Lake City, UT

Apr 2002 – Oct 2006

- Built the ColdFusion application for student records, finances, schedules, and testing used daily by staff and administration.
- Modeled academic data in Oracle and optimized access paths, cutting record lookup time 40%.
- Delivered the staff UI in ColdFusion, JavaScript, CSS, and HTML so academic teams could manage records without manual workarounds.

JavaScript · SQL · HTML · CSS · ColdFusion

EDUCATION

Stevens-Henager College · Bachelor of Computer Science

Sep 2002 – Oct 2006
